

# Lakefront Municipal Credit Memorandum

September 1, 2026

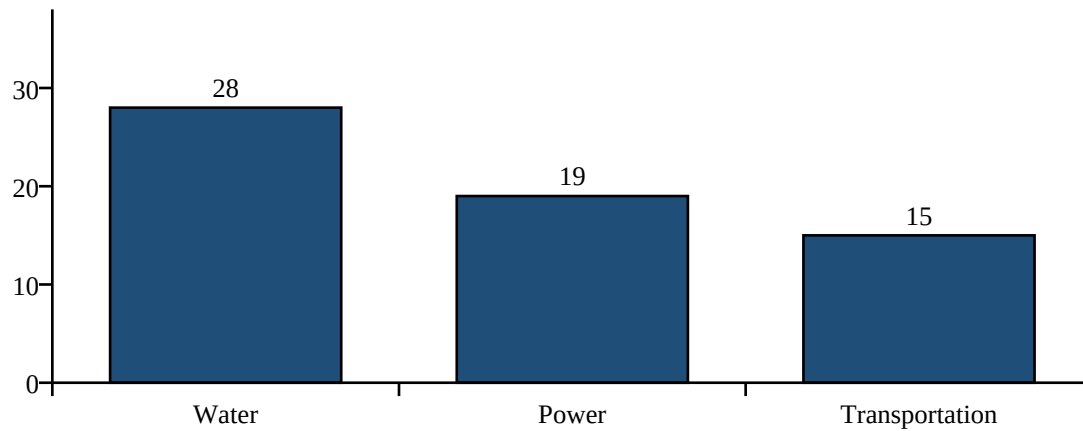

## Investment Thesis

Lakefront Allocation Group outlines a short list of essential service credits for a taxable account. The target is steady coupons from water, power, and toll facilities, with each position small enough that a single downgrade does not dominate the sleeve.

## Portfolio Holdings

| Issuer                | Sector         | Weight | Cost Basis |
|-----------------------|----------------|--------|------------|
| Bluewater Authority   | Water          | 14.2%  | \$101.25   |
| Cinder Power District | Power          | 10.6%  | \$98.40    |
| Red Maple Tollway     | Transportation | 8.1%   | \$103.10   |
| Harborside Waterworks | Water          | 6.4%   | \$99.75    |

## Sector Weights

## Principal Risks

- Rate cases can freeze coupons at Bluewater Authority for several years.
- Fuel switching could reduce load served by Cinder Power District.
- Traffic shortfalls would weaken coverage at Red Maple Tollway.
